## Mark Scheme for June 2010

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of pupils of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, OCR Nationals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by Examiners. It does not indicate the details of the discussions which took place at an Examiners' meeting before marking commenced.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the Report on the Examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

| 1 (i) | $\begin{aligned} & \mathrm{f}(2)=8+4 a-2 a-14 \\ & 2 a-6=0 \\ & a=3 \end{aligned}$ | M1* |  | Attempt $f(2)$ or equiv, including inspection / long division / coefficient matching |
| :---: | :---: | :---: | :---: | :---: |
|  |  | M1d* <br> A1 | 3 | Equate attempt at $f(2)$, or attempt at remainder, to 0 and attempt to solve Obtain $a=3$ |
| (ii) | $\begin{aligned} f(-1) & =-1+3+3-14 \\ & =-9 \end{aligned}$ | M1 |  | Attempt $f(-1)$ or equiv, including inspection / long division / coefficient matching |
|  |  | A1 ft | 2 | Obtain -9 (or $2 a-15$, following their $a$ ) |
|  |  |  | 5 |  |
| 2 (i) | $\begin{aligned} \text { area } & \approx \frac{1}{2} \times 3 \times(\sqrt[3]{8}+2(\sqrt[3]{11}+\sqrt[3]{14})+\sqrt[3]{17}) \\ & \approx 20.8 \end{aligned}$ | B1 |  | State or imply at least 3 of the 4 correct $y$-coords , and no others |
|  |  | M1 |  | Use correct trapezium rule, any $h$, to find area between $x=1$ and $x=10$ |
|  |  | M1 |  | Correct $h$ (soi) for their $y$-values - must be at equal intervals |
|  |  | A1 | 4 | Obtain 20.8 (allow 20.7) |
| (ii) | use more strips / narrower strips | B1 | 1 | Any mention of increasing $n$ or decreasing $h$ |
| 3 (i) | $(1+1 / 2 x)^{10}=1+5 x+11.25 x^{2}+15 x^{3}$ | B1 |  | Obtain $1+5 x$ |
|  |  | M1 |  | Attempt at least the third (or fourth) term of the binomial expansion, including coeffs |
|  |  | A1 |  | Obtain 11.25x ${ }^{2}$ |
|  |  | A1 |  | Obtain $15 x^{3}$ |
| (ii) | $\begin{aligned} \text { coeff of } x^{3} & =(3 \times 15)+(4 \times 11.25)+(2 \times 5) \\ & =100 \end{aligned}$ | M1 |  | Attempt at least one relevant term, with or without powers of $x$ |
|  |  | A1 ft |  | Obtain correct (unsimplified) terms (not necessarily summed) - either coefficients or still with powers of $x$ involved |
|  |  | A1 | 3 | Obtain 100 |
|  |  |  | 7 |  |

4 (i) $u_{1}=6, u_{2}=11, u_{3}=16$
B1 1 State $6,11,16$

| 6 a $\quad$ | $\int_{3}^{5}\left(x^{2}+4 x\right) \mathrm{d} x=\left[\frac{1}{3} x^{3}+2 x^{2}\right]_{3}^{5}$ |
| ---: | :--- |
|  | $=\left({ }^{125} / 3+50\right)-(9+18)$ |
|  | $=64 \frac{2}{3}$ |

M1
A1
M1 Use limits $x=3,5$ - correct order \& subtraction

A1 $\quad 4$ Obtain $64^{2} / 3$ or any exact equiv
b $\quad \int(2-6 \sqrt{y}) \mathrm{d} y=2 y-4 y^{\frac{3}{2}}+c$
B1

M1 Obtain $k y^{\frac{3}{2}}$
A1 3 Obtain $-4 y^{\frac{3}{2}}$ (condone absence of $+c$ )

B1
M1
A1

A1 ft 4 Obtain 4 (or $-k$ following their $k x^{-2}$ )
11
7 (i) $\frac{\sin ^{2} x-\cos ^{2} x}{1-\sin ^{2} x}=\frac{\sin ^{2} x-\cos ^{2} x}{\cos ^{2} x}$

$$
=\frac{\sin ^{2} x}{\cos ^{2} x}-\frac{\cos ^{2} x}{\cos ^{2} x}
$$

$$
=\tan ^{2} x-1 \quad \text { A1 }
$$

(ii) $\tan ^{2} x-1=5-\tan x$ $\tan ^{2} x+\tan x-6=0$ $(\tan x-2)(\tan x+3)=0$ $\tan x=2, \tan x=-3$ $x=63.4^{\circ}, 243^{\circ} \quad x=108^{\circ}, 288^{\circ}$

A1

A1 2 Use other identity to obtain given answer convincingly.
Use either $\sin ^{2} x+\cos ^{2} x=1$, or $\tan x=\sin x / \cos x$

State correct equation
Attempt to solve three term quadratic in $\tan x$

Obtain 2 and -3 as roots of their quadratic
Attempt to solve $\tan x=k$ (at least one root)

Obtain at least 2 correct roots
Obtain all 4 correct roots

1 (i) Attempt use of product rule
M1 producing ... $+\ldots$ form
Obtain $3 x^{2} \mathrm{e}^{2 x}+2 x^{3} \mathrm{e}^{2 x}$
A1 2 or equiv
(ii) Attempt use of chain rule to produce $\frac{k x}{3+2 x^{2}}$ form Obtain $\frac{4 x}{3+2 x^{2}}$ M1 any constant $k$ A1 2
(iii) Attempt use of quotient rule

M1 or equiv; condone $u / v$ confusions
Obtain $\frac{2 x+1-2 x}{(2 x+1)^{2}}$ or $(2 x+1)^{-1}-2 x(2 x+1)^{-2}$
A1 2 or (unsimplified) equiv
[If $\ldots+c$ included in all three parts and all three parts otherwise correct, award M1A1, M1A1, M1A0; otherwise ignore any inclusion of $\ldots+c$.]

## 6

2 (i) Obtain one of $\pm \ln ( \pm x \pm 4)$
Obtain correct equation $y=-\ln (x-4)$
M1
A1 2 or equiv; condone use of modulus signs instead of brackets
(ii) State, in any order, $\mathrm{S}, \mathrm{S}$ and T

State $T$, then $S$, then $S$

M1 or equiv such as $S^{2}$, T or $2 \mathrm{~S}, \mathrm{~T}$
A1 2 or equiv (note that $S, S, T^{9}$ and $S, T^{3}, S$ are alternative correct answers)

## 4

## B1

M1 using $\cos 2 \theta= \pm 1 \pm 2 \sin ^{2} \theta$ or equiv
A1 3 or $-6 \sin ^{2} \theta+11 \sin \theta+10=0$

A1 allow -42 or greater accuracy
A1 3 or greater accuracy; and no others between -180 and 180

4 (i) Either: Integrate to obtain $k \ln x$
Use at least one relevant logarithm property
Obtain $k \ln 3=\ln 81$ and hence $k=4$

B1
M1
A1 3 AG ; accurate work required

Or 1: (where solution involves no use of a logarithm property)

Integrate to obtain $k \ln x$ B1
Obtain correct explicit expression for $k$ and conclude $k=4$ with no error seen

B2 3 AG ; e.g. $k=\frac{\ln 81}{\ln 6-\ln 2}=4$
Or 2: (where solution involves verification of result by initial substitution of 4 for $k$ )

Integrate to obtain $4 \ln x$
Use at least one relevant logarithm property
Obtain $\ln 81$ legitimately with no error seen
(ii) State volume involves $\int \pi\left(\frac{4}{x}\right)^{2} \mathrm{~d} x$

Obtain integral of form $k_{1} x^{-1}$
Use correct process for finding volume produced from $S$

Obtain $16 \pi-\frac{16}{3} \pi$ and hence $\frac{32}{3} \pi$

B1 possibly implied
M1 any constant $k_{1}$ including $\pi$ or not
M1 $\quad \int\left(k_{2} 2^{2}-k_{3} y^{2}\right) \mathrm{d} x$, including $\pi$ or not with correct limits indicated; or equiv
A1 4 or exact equiv
7

M1 squaring both sides to obtain 3 terms on each side or considering 2 different linear eqns/inequalities
A1
A1
M1 table, sketch, ...; needs two critical values; implied by plausible answer
A1 5 with $\leq$ and not $<$
(ii) Use correct process to find value of $|x+2|$ using any value M1 $\ldots$ whether part of answer to (i) or not

Obtain $2 \frac{2}{3}$ or $\frac{8}{3}$

A1 2 dependent on 5 marks awarded in part (i) 7

6 (i) Attempt calculations involving 1.0 and 1.1
Obtain -0.57 and 0.76
Refer to sign change (or equiv for rearranged eqn)
(ii) Obtain correct first iterate

Carry out iteration process
Obtain at least 3 correct iterates
Obtain 1.05083

M1 using radians
A1 or values to 1 dp (rounded or truncated); or equivs (where eqn rearranged)
A1 3 AG; following correct work only
$[1 \rightarrow 1.047198 \rightarrow 1.050571 \rightarrow 1.050809 \rightarrow 1.050826 \rightarrow 1.050827$;
$1.05 \rightarrow 1.050769 \rightarrow 1.050823 \rightarrow 1.050827 \rightarrow 1.050827$;
$1.1 \rightarrow 1.054268 \rightarrow 1.051070 \rightarrow 1.050844 \rightarrow 1.050829 \rightarrow 1.050827]$
(iii) State or imply $\sec ^{2} 2 x=1+\tan ^{2} 2 x$

Relate to earlier equation
B1
M1 by halving or doubling answer to (ii) or carrying out equivalent iteration process
Deduce $2 x=1.05083$ and hence 0.525
A1 $\sqrt{ } 3$ following their answer to (ii); or greater accuracy
[SC: Rearrange to obtain $x=\frac{1}{2} \cos ^{-1}(2 x+3)^{-\frac{1}{2}}$
Use iterative process to obtain 0.525

B1 using value $x_{1}$ such that $1.0 \leq x_{1} \leq 1.1$
M1 obtaining at least 3 iterates in all so far
A1 showing at least 3 dp
A1 4 answer required to exactly 5 d.p.

B1
B1 2 or greater accuracy]
10
$7 \quad$ Differentiate to obtain $k_{1}(3 x-1)^{3}$
Obtain correct $12(3 x-1)^{3}$
Substitute 1 to obtain 96
Attempt to find $x$-coordinate of $Q$
Obtain $\frac{5}{6}$

Integrate to obtain $k_{2}(3 x-1)^{5}$
Obtain correct $\frac{1}{15}(3 x-1)^{5}$
Use limits $\frac{1}{3}$ and 1 to obtain $\frac{32}{15}$
Attempt to find shaded area by correct process
Obtain $\left(\frac{32}{15}-\frac{1}{2} \times \frac{1}{6} \times 16\right.$ and hence) $\frac{4}{5}$

M1 any constant $k_{1}$
A1 or (unsimplified) equiv
A1
M1 using tangent with $y=0$ or using gradient
A1 or exact equiv

M1 any constant $k_{2}$
A1 or (unsimplified) equiv
A1
M1 integral - triangle or equiv
A1 or equiv

8 (i) Obtain $R=3 \sqrt{2}$ or $R=\sqrt{18}$ or $R=4.24$
Attempt to find value of $\alpha$
Obtain $\frac{1}{4} \pi$ or 0.785

B1 or equiv
M1 condone sin/cos muddles and degrees
A1 3 in radians now
(ii) a Equate $x-\alpha$ to $\frac{1}{2} \pi$ or attempt solution
of $3 \cos x+3 \sin x=0$
Obtain $\frac{3}{4} \pi$
M1 condone degrees here
A1 2 or $\ldots,-\frac{5}{4} \pi,-\frac{1}{4} \pi, \frac{7}{4} \pi, \ldots$; in radians now
b Attempt correct process to find value of $3 x-\alpha$
Obtain at least one correct exact value of $3 x-\alpha$
Attempt at least one positive value of $x$
Obtain $\frac{1}{36} \pi$
*M1 with attempt at rearranging $\mathrm{T}(3 x)=\frac{8}{9} \sqrt{6}$
A1 $\pm \frac{1}{6} \pi, \pm \frac{11}{6} \pi, \ldots$
M1 $\quad \operatorname{dep}$ *M
A1 4
9

9 (i) Attempt to find $x$-coord of staty point or complete square M

Obtain $\left(\frac{3}{2},-9\right)$ or $4\left(x-\frac{3}{2}\right)^{2}-9$ or -9
State $f(x) \geq-9$

A1 3 using any notation; with $\geq$
(ii) Make one correct (perhaps general) relevant statement

B1 not $1-1$, f is many-one, $\ldots$; maybe implied if attempt is specific to this f
Conclude with correct evidence related to this f
B1 2 AG; (more or less) correct sketch; correct relevant calculations, ...
(iii) Either: Attempt to find expression for $\mathrm{g}^{-1}$

Obtain $\frac{1}{a}(x-b)$
Compare $\frac{1}{a}(x-b)$ and $a x+b$
*M1 or equiv
A1 or equiv
M1 dep *M; by equating either coefficients of $x$ or constant terms (or both); or substituting two non-zero values of $x$ and solving eqns for $a$
Obtain at least $-\frac{b}{a}=b$ and hence $a=-1$
A1 4 AG ; necessary detail required; or equiv
[SC1: first two steps as above, then substitute $a=-1$ : max possible M1A1B1]
[SC2: substitute $a=-1$ at start: Attempt to find inverse M1 Obtain $-x+b$ and conclude A1 2]
Or: $\quad$ State or imply that $y=\mathrm{g}^{-1}(x)$ is reflection
of $y=\mathrm{g}(x)$ in line $y=x$
State that line unchanged by this reflection is perpendicular to $y=x$
Conclude that $a$ is -1

## B1

M2
A1 4
(iv) State or imply that $\mathrm{gf}(x)=-\left(4 x^{2}-12 x\right)+b$

Attempt use of discriminant or relate to range of f Obtain $64+16 b<0$ or $9+b<5$
Obtain $b<-4$

B1
M1 or equiv
A1 or equiv
A1 4

1 First 2 terms in expansion $=1-5 x$
$3^{\text {rd }}$ term shown as $\frac{-\frac{5}{3} \cdot-\frac{8}{3}}{2}(3 x)^{2}$
$=+20 x^{2}$
$4^{\text {th }}$ term shown as $\frac{-\frac{5}{3} \cdot-\frac{8}{3} \cdot-\frac{11}{3}}{2.3}(3 x)^{3}$
$=-\frac{220}{3} x^{3}$ ISW
A1 Accept $-\frac{440}{6} x^{3}$ ISW
N.B. If 0 , SR B2 to be awarded for $1-\frac{5}{3} x+\frac{20}{9} x^{2}-\frac{220}{81} x^{3}$. Do not mark $(1+x)^{-5 / 3}$ as a MR.

Attempt quotient rule
M1
[ Show fraction with denom $(1-\sin x)^{2} \&$ num $+/-(1-\sin x)+/-\sin x+/-\cos x+/-\cos x$ ]
Numerator $=(1-\sin x) .-\sin x-\cos x .-\cos x$
A1 terms in any order
\{ Product symbols must be clear or implied by further work \}

Reduce correct numerator to $1-\sin x$
Simplify to $\frac{1}{1-\sin x}$ ISW
$\frac{A}{x-1}+\frac{B}{(x-1)^{2}}+\frac{C}{x-2}$
$A(x-1)(x-2)+B(x-2)+C(x-1)^{2} \equiv x^{2}$
$A=-3$
$B=-1$
$C=4$

B1 or $-\sin x+\sin ^{2} x+\cos ^{2} x$
A1 Accept $-\frac{1}{\sin x-1}$
4
M1 For correct format

M1
A1
A1 (B1 if cover-up rule used)
A1 (B1 if cover-up rule used)
[NB1: Partial fractions need not be written out; correct format + correct values sufficient.
NB2: Having obtained $B \& C$ by cover-up rule, candidates may substitute into general expression \& algebraically manipulate; the M1 \& A1 are then available if deserved.]

These special cases using different formats are the only other ones to be considered Max $\frac{A}{x-1}+\frac{B x+C}{(x-1)^{2}}+\frac{D}{x-2} ;$ M1 M1; A0 for any values of $A, B \& C$, A1 or B1 for $D=4 \quad 3$ $\frac{A x+B}{(x-1)^{2}}+\frac{C}{x-2} ; \quad$ M0 M1; A1 for $A=-3 \underline{\text { and }} B=2, \quad$ A1 or B1 for $C=4 \quad 3$

4

5
$\frac{\mathrm{d}}{\mathrm{d} x}(x y)=x \frac{\mathrm{~d} y}{\mathrm{~d} x}+y \quad$ s.o.i.
$\frac{\mathrm{d}}{\mathrm{d} x}\left(y^{2}\right)=2 y \frac{\mathrm{~d} y}{\mathrm{~d} x}$
$\mathrm{d} x=2 u \mathrm{~d} u$ or $\frac{\mathrm{d} u}{\mathrm{~d} x}=\frac{1}{2}(x+2)^{-\frac{1}{2}} \quad$ AEF
$\frac{652}{15}$ or $43 \frac{7}{15}$

Att by diff to connect $\mathrm{d} x \& \mathrm{~d} u$ or find $\frac{\mathrm{d} x}{\mathrm{~d} u}$ or $\frac{\mathrm{d} u}{\mathrm{~d} x}$ (not $\mathrm{d} x=\mathrm{d} \underline{\text { u }}$ M1 $\quad$ no accuracy; not 'by parts' A1

A1 May be implied later

M1
\{If relevant, cancel $u / u$ and $\}$ attempt to square out $\left\{\operatorname{dep} \int k \mathrm{I}(\mathrm{d} u)\right.$ where $k=2$ or $\frac{1}{2}$ or 1 and $\mathrm{I}=\left(u^{2}-2\right)^{2}$ or $\left(2-u^{2}\right)^{2}$ or $\left.\left(\mathrm{u}^{2}+2\right)^{2}\right\}$

Att to change limits if working with $\mathrm{f}(u)$ after integration
or re-subst into integral attempt and use $-1 \& 7$

Indef integ $=\frac{2}{5} u^{5}+/-\frac{8}{3} u^{3}+8 u$ or $\frac{1}{10} u^{5}+/-\frac{2}{3} u^{3}+2 u \quad \mathrm{~A} 1$ or $\frac{1}{5} u^{5}+/-\frac{4}{3} u^{3}+4 u$

ISW but no ' +c '
$\operatorname{Diff}$ eqn( $=0$ can be implied)(solve for $\frac{\mathrm{d} y}{\mathrm{~d} x}$ and ) put $\frac{\mathrm{d} y}{\mathrm{~d} x}=0 \mathrm{M} 1$
Produce only $2 x+4 y=0$ (though AEF acceptable)
*A1 without any error seen
Eliminate $x$ or $y$ from curve eqn \& eqn(s) just produced M1
Produce either $x^{2}=36$ or $y^{2}=9$
dep* A1 Disregard other solutions dep* A1 Sign aspect must be clear
$( \pm 6, \mp 3) \mathrm{AEF}$, as the only answer ISW

6 (i) State/imply scalar product of any two vectors $=0$
Scalar product of correct two vectors $=4+2 a-6$
$a=1$
(ii) (a) Attempt to produce at least two relevant equations

Solve two not containing ' $a$ ' for $s$ and $t$
Obtain at least one of $s=-\frac{1}{2}, t=1$
Substitute in third equation \& produce $a=-2$
(b) Method for finding magnitude of any vector

Using $\cos \theta=\frac{\mathbf{a} \cdot \mathbf{b}}{|\mathbf{a}| \boldsymbol{b} \mid}$ for the pair of direction vectors
$107,108(107.548)$ or $72,73,72.4,72.5(72.4516)$ c.a.o. A1 $3 \underline{1.87,1.88(1.87707) \text { or } 1.26}$

7 (i) Differentiate $x$ as a quotient, $\frac{v \mathrm{~d} u-u \mathrm{~d} v}{v^{2}}$ or $\frac{u \mathrm{~d} v-v \mathrm{~d} u}{v^{2}}$ M1 or product clearly defined
$\frac{\mathrm{d} x}{\mathrm{~d} t}=-\frac{1}{(t+1)^{2}} \quad$ or $\frac{-1}{(t+1)^{2}} \quad$ or $-(t+1)^{-2}$
A1 $\quad W W W \rightarrow 2$
$\frac{\mathrm{d} y}{\mathrm{~d} t}=-\frac{2}{(t+3)^{2}}$ or $\frac{-2}{(t+3)^{2}}$ or $-2(t+3)^{-2}$
$\frac{\mathrm{d} y}{\mathrm{~d} x}=\frac{\frac{\mathrm{d} y}{\mathrm{~d} t}}{\frac{\mathrm{~d} t}{\mathrm{~d} t}}$
M1 quoted/implied and used
$\frac{\mathrm{d} y}{\mathrm{~d} x}=\frac{2(t+1)^{2}}{(t+3)^{2}} \quad$ or $\frac{2(t+3)^{-2}}{(t+1)^{-2}} \quad\left(\operatorname{dep} 1^{\text {st }} 4\right.$ marks $) * A 1 \quad$ ignore ref $t=-1, t=-3$
State squares +ve or $(t+1)^{2} \&(\mathrm{t}+3)^{2}+\mathrm{ve} \therefore \frac{\mathrm{d} y}{\mathrm{~d} x}+\mathrm{ve} \quad$ dep*A1 6 or $\left(\frac{t+1}{t+3}\right)^{2}+\mathrm{ve}$. Ignore $\geq 0$
(ii) Attempt to obtain $t$ from either the $x$ or $y$ equation M1 No accuracy required $t=\frac{2-x}{x-1} \quad$ AEF $\quad$ or $\quad t=\frac{2}{y}-3 \quad$ AEF
A1

Substitute in the equation not yet used in this part
M1 or equate the 2 values of $t$
Use correct meth to eliminate ('double-decker') fractions M1
Obtain $2 x+y=2 x y+2$ ISW AEF
A15 but not involving fractions

8 (i) Long division method
Evidence of division process as far as $1^{1 t}$ stage incl sub
M1 $\equiv Q(x-1)+R$
(Quotient =) $x-4$
A1 $\quad Q=x-4$
(Remainder $=$ ) 2 ISW
(ii) (a) Separate variables; $\int \frac{1}{y-5} \mathrm{~d} y=\int \frac{x^{2}-5 x+6}{x-1} \mathrm{~d} x$ A1 $3 R=2$; N.B. might be B1 Change $\frac{x^{2}-5 x+6}{x-1}$ into their (Quotient $+\frac{\text { Rem }}{x-1}$ )

M1 ' $\int$ ' may be implied later M1
$\ln (y-5)=\sqrt{ }$ (integration of their previous result) $(+c)$ ISW $\sqrt{ }$ A1 3 f.t. if using Quot $+\frac{\text { Rem }}{x-1}$
(ii) (b) Substitute $y=7, x=8$ into their eqn containing ' $c$ '

M1 $\quad \&$ attempt ' $c$ ' $\left(-3.2, \ln \frac{2}{49}\right)$
Substitute $x=6$ and their value of ' $c$ '
$y=5.00 \quad(5.002529) \quad$ Also $5+\frac{50}{49} \mathrm{e}^{-6}$
M1 \& attempt to find $y$

Beware: any wrong working anywhere $\rightarrow \mathrm{A} 0$ even if answer is one of the acceptable ones.

9 (i) Attempt to multiply out $(x+\cos 2 x)^{2}$
Finding $\int 2 x \cos 2 x \mathrm{~d} x$
Use $u=2 x, \mathrm{~d} v=\cos 2 x$
$1^{\text {st }}$ stage $x \sin 2 x-\int \sin 2 x \mathrm{~d} x$
$\therefore \int 2 x \cos 2 x \mathrm{~d} x=x \sin 2 x+\frac{1}{2} \cos 2 x$
Finding $\int \cos ^{2} 2 x \mathrm{~d} x$
Change to $k \int+/-1+/-\cos 4 x \mathrm{~d} x$
Correct version $\frac{1}{2} \int 1+\cos 4 x \mathrm{~d} x$
$\int \cos 4 x \mathrm{~d} x=\frac{1}{4} \sin 4 x$
Result $=\frac{1}{2} x+\frac{1}{8} \sin 4 x$
(i) ans $=\frac{1}{3} x^{3}+x \sin 2 x+\frac{1}{2} \cos 2 x+\frac{1}{2} x+\frac{1}{8} \sin 4 x(+\mathrm{c})$

M1 where $k=\frac{1}{2}, 2$ or 1

A1

B1 seen anywhere in this part
(ii) $\quad \mathrm{V}=\pi \int_{0}^{\frac{1}{2} \pi}(x+\cos 2 x)^{2}(\mathrm{~d} x)$

Use limits $0 \& \frac{1}{2} \pi$ correctly on their (i) answer
M1
(i) correct value $=\frac{1}{24} \pi^{3}-\frac{1}{2}+\frac{1}{4} \pi-\frac{1}{2}$

Final answer $=\pi\left(\frac{1}{24} \pi^{3}+\frac{1}{4} \pi-1\right)$
A1 4 c.a.o. No follow-through

13

## Alternative methods

2 If $y=\frac{\cos x}{1-\sin x}$ is changed into $y(1-\sin x)=\cos x$, award
M1 for clear use of the product rule (though possibly trig differentiation inaccurate)
A1 for $-y \cos x+(1-\sin x) \frac{d y}{d x}=-\sin x$
AEF
B1 for reducing to a fraction with $1-\sin x$ or $-\sin x+\sin ^{2} x+\cos ^{2} x$ in the numerator
A1 for correct final answer of $\frac{1}{1-\sin x}$ or $(1-\sin x)^{-1}$

If $y=\frac{\cos x}{1-\sin x}$ is changed into $y=\cos x(1-\sin x)^{-1}$, award
M1 for clear use of the product rule (though possibly trig differentiation inaccurate)
A1 for $\left(\frac{d y}{d x}\right)=\cos ^{2} x(1-\sin x)^{-2}+(1-\sin x)^{-1} .-\sin x \quad$ AEF

B1 for reducing to a fraction with $1-\sin x$ or $-\sin x+\sin ^{2} x+\cos ^{2} x$ in the numerator
A1 for correct final answer of $\frac{1}{1-\sin x}$ or $(1-\sin x)^{-1}$
6(ii)(a) If candidates use some long drawn-out method to find ' $a$ ' instead of the direct route, allow
M1 as before, for producing the 3 equations
M1 for any satisfactory method which will/does produce ' $a$ ', however involved
A2 for $a=-2$
7(ii) Marks for obtaining this Cartesian equation are not available in part (i).
If part (ii) is done first and then part (i) is attempted using the Cartesian equation, award marks as follow:
Method 1 where candidates differentiate implicitly
M1 for attempt at implicit differentiation
A1 for $\frac{\mathrm{d} y}{\mathrm{~d} x}=\frac{2 y-2}{1-2 x}$ AEF
M1 for substituting parametric values of $x$ and $y$
A2 for simplifying to $\frac{2(t+1)^{2}}{(t+3)^{2}}$
A1 for finish as in original method
Method 2 where candidates manipulate the Cartesian equation to find $x=$ or $y=$
M1 for attempt to re-arrange so that either $y=\mathrm{f}(x)$ or $x=\mathrm{g}(y)$
A1 for correct $y=\frac{2-2 x}{1-2 x}$ AEF or $x=\frac{2-y}{2-2 y} \quad$ AEF
M1 for differentiating as a quotient
A2 for obtaining $\frac{\mathrm{d} y}{\mathrm{~d} x}=\frac{2}{(1-2 x)^{2}}$ or $\frac{(2-2 y)^{2}}{2}$
A1 for finish as in original method
8(ii)(b) If definite integrals are used, then
M2 for []$_{y}^{7}=[]_{6}^{8}$ or equivalent or M1 for []$_{7}^{y}=[]_{6}^{8}$ or equivalent

A2
for $5,5.0,5.00(5.002529)$ with caveat as in main scheme dep M $\underline{2}$

## Mark Scheme for June 2010

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of pupils of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, OCR Nationals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by Examiners. It does not indicate the details of the discussions which took place at an Examiners' meeting before marking commenced.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the Report on the Examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

1

B1 Establish result true for $n=1$ or $n=2$
M1 Add next term to given sum formula
M1 Attempt to factorise or expand and simplify to correct expression
A1 Correct expression obtained
A1 5 Specific statement of induction conclusion

## 5

M1 Obtain a single value
A1 2 Obtain correct answer as a matrix
(ii) $\quad \mathrm{BA}=\left(\begin{array}{ll}5 & -20 \\ 3 & -12\end{array}\right)$

$$
\left(\begin{array}{ll}
-7 & -20 \\
11 & -20
\end{array}\right)
$$

M1 Obtain a $2 \times 2$ matrix

A1 All elements correct
B1 4C seen or implied by correct answer
B1ft 4 Obtain correct answer, ft for a slip in BA

3
Either
$\frac{2}{3} n(n+1)(2 n+1)-2 n(n+1)+n$
$\frac{1}{3} n(2 n-1)(2 n+1)$
Or
$\sum_{r=1}^{2 n} r^{2}-4 \sum_{r=1}^{n} r^{2}$
$\frac{1}{6} \times 2 n(2 n+1)(4 n+1)-4 \times \frac{1}{6} n(n+1)(2 n+1)$
$\frac{1}{3} n(2 n-1)(2 n+1)$

M1 Express as a sum of 3 terms
M1 Use standard sum results

A1 Correct unsimplified answer
M1 Attempt to factorise
A1 Obtain at least factor of $n$ and a quadratic
A1 6 Obtain correct answer a.e.f.

M1 Express as difference of $2 \sum r^{2}$ series
M1 Use standard result
A1 Correct unsimplified answer
M1 Attempt to factorise
A1 Obtain at least factor of $n$

A1 Obtain correct answer
4
(i) $5+12 \mathrm{i}$
13
$67.4^{\circ}$ or 1.18

B1B1 Correct real and imaginary parts
B1ft Correct modulus
B1ft 4 Correct argument
(ii)
M1 Multiply by conjugate
A1 Obtain correct numerator
$-\frac{11}{85}-\frac{27}{85} \mathrm{i}$
A1 3 Obtain correct denominator
7
$5 \quad$ (a) $\quad\left(\begin{array}{ll}0 & 1 \\ 1 & 0\end{array}\right)$
B1B12 Each column correct
SC B2 use correct matrix from MF1 Can be trig form
(b) (i)

B1B12 Stretch, in $x$-direction sf 5
(ii)

B1B12 Rotation, $60^{\circ}$ clockwise
6
$6 \quad$ (i) $\quad \begin{aligned} & \text { (a) } \\ & \text { (b) }\end{aligned}$
B1B12 Circle centre (3, -4), through origin
B1B12 Vertical line, clearly $x=3$
(ii)

B1ft Inside their circle
B1ft 2 And to right of their line, if vertical
6

7

Either
$\alpha+\beta=-2 k \quad \alpha \beta=k$
$y^{2}-4 k y+4 k=0$
Or
$\alpha+\beta=-2 k$
$\frac{-2 k}{\alpha}$
$y=\frac{-2 k}{x}$
$y^{2}-4 k y+4 k=0$
Or
$-k \pm \sqrt{k^{2}-k}$
$\frac{\alpha+\beta}{\alpha}=\frac{2 k}{k+\sqrt{k^{2}-k}}, \frac{\alpha+\beta}{\beta}=\frac{2 k}{k-\sqrt{k^{2}-k}}$
$y^{2}-4 k y+4 k=0$

B1B1 State or use correct results
M1 Attempt to find sum of new roots
A1 Obtain $4 k$
M1 Attempt to find product of new roots
A1 Obtain $4 k$
B1ft 7 Correct quadratic equation a.e.f.

B1 State or use correct result
B1 State or imply form of new roots
B1 State correct substitution
M1 Rearrange and substitute for $x$
A1 Correct unsimplified equation
M1 Attempt to clear fractions
A1 Correct quadratic equation a.e.f.

B1 Find roots of original equation

B1 Express both new roots in terms of $k$

M1 Attempt to find sum of new roots
A1 Obtain $4 k$
M1 Attempt to find product of new roots
A1 Obtain $4 k$
$\mathrm{B} 1 \mathrm{ft} \quad$ Correct quadratic equation a.e.f.
8 (i)
M1 Attempt to rationalise denominator or cross multiply
A1 2 Obtain given answer correctly

(ii) |  | M1 | Express terms as differences using (i) |
| :--- | :--- | :--- |
|  | M1 | Attempt this for at least 1 $1^{\text {st }}$ three terms |
|  | A1 | $1^{\text {st }}$ three terms all correct |
|  | A1 | Last two terms all correct |
|  | M1 | Show pairs cancelling |
|  | A1 $(\sqrt{n+2}+\sqrt{n+1}-\sqrt{2}-1)$ | A1 |

(iii)

## B1 $\mathbf{1}$ Sensible statement for divergence 9

$9 \quad$ (i)
M1 Show correct expansion process for $3 \times 3$
M1 Correct evaluation of any $2 \times 2$
$\operatorname{det} \mathbf{A}=a^{2}-a$
A1 3 Obtain correct answer
(ii) (a)
(b)
(c)

B1 6 State unique solution
SC if detA incorrect, can score 2 marks
for correct deduction of a unique solution, but only once
$10 \quad$ (i)

$$
\begin{aligned}
& x^{2}-y^{2}=3 \quad x y=2 \\
& z=2+i
\end{aligned}
$$

M1 Attempt to equate real and imaginary parts
A1 Obtain both results
M1 Eliminate to obtain quadratic in $x^{2}$ or $y^{2}$
M1 Solve to obtain $x$ or $y$ value
A1 5 Obtain correct answer as a complex no.
(ii)
(iii)

$$
w^{3}=2 \pm 11 \mathrm{i}
$$

$w=2-\mathrm{i}$

B1 1 Obtain given answer correctly

M1 Attempt to solve quadratic equation
A1 Obtain correct answers
M1 Choose negative sign
M1 Relate required value to conjugate of (i)
A1 5 Obtain correct answer
11

1 Derive/quote $\mathrm{g}^{\prime}(x)=p /\left(1+x^{2}\right)$
Attempt $\mathrm{f}^{\prime}(x)$ as $a /\left(1+b x^{2}\right)$
Use $x=1 / 2$ to set up a solvable equation in $p$, leading to at least one solution Get $p=5 / 4$ only

2 Reasonable attempt at $\mathrm{e}^{2 x}\left(1+2 x+2 x^{2}\right)$
Multiply out their expressions to get all terms up to $x^{2}$
Get $1+3 x+4 x^{2}$
Use binomial, equate coefficients to get 2 solvable equations in $a$ and $n$
Reasonable attempt to eliminate $a$ or $n$
Get $n=9, a=1 / 3$ cwo

## B1

M1 Allow any $a, b=2$ or 4

M1
A1 AEEF
M1 3 terms of the form $1+2 x+a x^{2}, a \neq 0$
M1 (3 terms) x (minimum of 2 terms)
A1 cao
Reasonable attempt at binomial, each term
M1 involving $a$ and $n\left(a n=3, a^{2} n(n-1) / 2=4\right)$
M1
A1 cao
SC Reasonable $\mathrm{f}^{\prime}(x)$ and $\mathrm{f}^{\prime \prime}(x)$ using
product rule ( 2 terms)
Use their expressions to find $f^{\prime}(0)$ and $f^{\prime \prime}(0) \quad$ M1
Get $1+3 x+4 x^{2}$ cao A1

## B1

M1 From their expressions
A1

M1
A1 $\sqrt{ }$ Must involve $\sqrt{ } 3$
A1 A.G.
(ii)

B1 Correct shape in $-1<x \leq 3$ only (allow just top or bottom half)

B1 $90^{\circ}$ (at $x=3$ ) (must cross $x$-axis i.e. symmetry)
B1 Asymptote at $x=-1$ only (allow -1 seen)
B1 $\sqrt{ }$ Correct crossing points; $\pm \sqrt{ }(b / c)$ from their $b, c$

5 (i) Reasonable attempt at parts
Get $\mathrm{e}^{x}(1-2 x)^{n}-\int \mathrm{e}^{x} \cdot n(1-2 x)^{n-1} .-2 \mathrm{~d} x$
Evidence of limits used in integrated part Tidy to A.G.
(ii) Show any one of $I_{3}=6 I_{2}-1, I_{2}=4 I_{1}-1$, $I_{1}=2 I_{0}-1$
Get $I_{0}\left(=\mathrm{e}^{1 / 2}-1\right)$ or $I_{1}\left(=2 \mathrm{e}^{1 / 2}-3\right)$
Substitute their values back for their $I_{3}$ Get $48 \mathrm{e}^{1 / 2}-79$

6 (i) Reasonable attempt to differentiate $\sinh y=x$ to get $\mathrm{d} y / \mathrm{d} x$ in terms of $y$ Replace $\sinh y$ to A.G.
(ii) Reasonable attempt at chain rule Get $\mathrm{d} y / \mathrm{d} x=a \sinh \left(a \sinh ^{-1} x\right) / \sqrt{ }\left(x^{2}+1\right)$
Reasonable attempt at product/quotient Get $\mathrm{d}^{2} y / \mathrm{d} x^{2}$ correctly in some form Substitute in and clearly get A.G.

M1 Leading to second integral
A1 Or $(1-2 x)^{n+1} /(-2(n+1)) \mathrm{e}^{x}$ $-\int(1-2 x)^{n+1} /(-2(n+1)) \mathrm{e}^{x} \mathrm{~d} x$
M1 Should show $\pm 1$
A1 Allow $I_{n+1}=2(n+1) I_{n}-1$

B1 May be implied
B1
M1 Not involving $n$ A1

M1 Allow $\pm \cosh y \mathrm{~d} y / \mathrm{d} x=1$
A1 Clearly use $\cosh ^{2}-\sinh ^{2}=1$
SC Attempt to diff. $y=\ln \left(x+\sqrt{ }\left(x^{2}+1\right)\right)$ using chain rule

M1
Clearly tidy to A.G. A1
M1 To give a product
A1
M1 Must involve sinh and cosh
$\mathrm{A} 1 \sqrt{ }$ From $\mathrm{d} y / \mathrm{d} x=k \sinh \left(a \sinh ^{-1} x\right) / \sqrt{ }\left(x^{2}+1\right)$
A1
SC Write $\sqrt{ }\left(x^{2}+1\right) \mathrm{d} y / \mathrm{d} x=k \sinh \left(a \sinh ^{-1} x\right)$ or similar Derive the A.G.

B1 $\sqrt{ }$ Any 3(minimum) correct from previous value
B1 Allow one B1 for 5.24 seen if 2 d.p.used
(ii) Show reasonable staircase for any region B1 Drawn curve to line Describe any one of the three cases
Describe all three cases

B1
B1
(iii) Reasonable attempt to use log/expo. rules M1 Allow derivation either way

Clearly get A.G.
Attempt $\mathrm{f}^{\prime}(x)$ and use at least once in correct N-R formula
Get answers that lead to 1.31
(iv) Show $\mathrm{f}^{\prime}(\ln 36)=0$

Explain why N-R would not work

A1 Minimum of 2 answers; allow truncation/rounding to at least 3 d.p.

B1
B1 Tangent parallel to $O x$ would not meet $O x$ again or divide by 0 gives an error

8 (i) Use correct definition of $\cosh x$
Attempt to cube their definition involving $\mathrm{e}^{x}$ and $\mathrm{e}^{-x}$ (or $\mathrm{e}^{2 x}$ and $\mathrm{e}^{x}$ ) Put their 4 terms into LHS and attempt to simplify
Clearly get A.G.
(ii) Rewrite as $k \cosh 3 x=13$

Use ln equivalent on $13 / k$

Get $x=( \pm) 1 / 3 \ln 5$
Replace in $\cosh x$ for $u$
Use $\mathrm{e}^{a \ln b}=b^{a}$ at least once
Get $1 / 2\left(5^{1 / 3}+5^{-1 / 3}\right)$
9 (i) Attempt integral as $k(2 x+1)^{1.5}$
Get 9
Attempt subtraction of areas Get 3
(ii) Use $r^{2}=x^{2}+y^{2}$ and $x=r \cos \theta, y=r \sin \theta$

Eliminate $x$ and $y$ to produce quadratic equation (=0) in $r($ or $\cos \theta)$ Solve their quadratic to get $r$ in terms of $\theta$
(or vice versa)
Clearly get A.G.
Clearly show $\theta_{1}($ at $B)=\tan ^{-1} 3 / 4$ and $\theta_{2}($ at $A)=\pi$

A1 $r>0$ may be assumed

## B1

SC Eliminate $y$ to get $r$ in terms of $x$ only M1 Get $r=x+1$

A1
SC Start with $r=1 /(1-\cos \theta)$ and derive cartesian
B1 cwo; ignore limits
M1 Not just quoted
M1 To get $\int=$ some constant
A1 A.G.

## Mark Scheme for June 2010

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of pupils of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, OCR Nationals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by Examiners. It does not indicate the details of the discussions which took place at an Examiners' meeting before marking commenced.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the Report on the Examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

2 (i) $a r=r^{5} a \Rightarrow r a r=r^{6} a$
$r^{6}=e \Rightarrow r a r=a$
M1 Pre-multiply $a r=r^{5} a$ by $r$
A1 2 Use $r^{6}=e$ and obtain answer AG
(ii) METHOD 1

For $n=1, r a r=a$ OR For $n=0, r^{0} a r^{0}=a$
B1 For stating true for $n=1 O R$ for $n=0$
Assume $r^{k} a r^{k}=a$
EITHER Assumption $\Rightarrow r^{k+1} a r^{k+1}=r a r=a$
M1 $\quad$ For attempt to prove true for $k+1$
OR $\quad r^{k+1} a r^{k+1}=r . r^{k} a r^{k} . r=r a r=a$
OR $\quad r^{k+1} a r^{k+1}=r^{k}$. rar $\cdot r^{k}=r^{k} a r^{k}=a$
A1 For obtaining correct form
Hence true for all $n \in \mathbb{Z}^{+}$
A1 4 For statement of induction conclusion
METHOD 2
$r^{2} a r^{2}=r . r a r . r=r a r=a$, similarly for
M1 For attempt to prove for $n=2,3$
$r^{3} a r^{3}=a$
$r^{4} a r^{4}=r \cdot r^{3} a r^{3} \cdot r=r a r=a$,
A1 $\quad$ For proving true for $n=2,3,4,5$
similarly for $r^{5} a r^{5}=a$
$r^{6} a r^{6}=e a e=a$
B1 For showing true for $n=6$
For $n>6, r^{n}=r^{n \bmod 6}$, hence true for all $n \in \mathbb{Z}^{+} \quad$ A1
METHOD 3
$r^{n} a r^{n}=r^{n-1} \cdot$.rar. $r^{n-1}$
M1 Starting from $n$, for attempt to prove true for $n-1$
OR $r^{n} a r^{n}=r^{n} \cdot r^{5} a \cdot r^{n-1}=r^{n+5} a r^{n-1}$
$=r^{n-1} a r^{n-1}$
$=r^{n-2} a r^{n-2}=\ldots$
For proving true for $n-1$
A1 For continuation from $n-2$ downwards
$=r a r=a$
For final use of $\operatorname{rar}=a$
SR can be done in reverse

## METHOD 4

$a r=r^{5} a \Rightarrow a r^{2}=r^{5} a r=r^{10} a$ etc.
$\Rightarrow a r^{n}=r^{5 n} a$
$\Rightarrow r^{n} a r^{n}=r^{6 n} a$
$=e a=a$
M1 $\quad$ For attempt to derive $a r^{n}=r^{5 n} a$
A1 For correct equation
SR may be stated without proof
B1 For pre-multiplication by $r^{n}$
A1 $\quad$ For obtaining $a\left(r^{6}=e\right.$ may be implied $)$

3
(i) $w^{2}=\cos \frac{4}{5} \pi+i \sin \frac{4}{5} \pi$
$w^{3}=\cos \frac{6}{5} \pi+\mathrm{i} \sin \frac{6}{5} \pi$
$w^{*}=\cos \frac{2}{5} \pi-\mathrm{i} \sin \frac{2}{5} \pi$
$=\cos \frac{8}{5} \pi+\mathrm{i} \sin \frac{8}{5} \pi$
(ii)

(iii) $\quad z^{5}-1=0$ OR $z^{5}+z^{4}+z^{3}+z^{2}+z=0$

Allow cis $\frac{k}{5} \pi$ and $\mathrm{e}^{\frac{\mathrm{k}}{5} \pi \mathrm{i}}$ throughout
B1 For correct value
B1 For correct value
B1 For $w^{*}$ seen or implied
B1 4 For correct value
SR For exponential form with i missing, award B0 first time, allow others

B1* For $1+w$ in approximately correct position
B1 For $A B \approx B C \approx C D$
(*dep)
B1 For $B C, C D$ equally inclined to Im axis
(*dep)
B1 4 For $E$ at the origin
Allow points joined by arcs, or not joined Labels not essential

B1 1 For correct equation AEF (in any variable) Allow factorised forms using $w$, exp or trig

## 9

4
(i) $y=x z \Rightarrow \frac{\mathrm{~d} y}{\mathrm{~d} x}=z+x \frac{\mathrm{~d} z}{\mathrm{~d} x}$
$\Rightarrow x z+x^{2} \frac{\mathrm{~d} z}{\mathrm{~d} x}-x z=x \cos z \Rightarrow x \frac{\mathrm{~d} z}{\mathrm{~d} x}=\cos z$
$\Rightarrow \int \sec z \mathrm{~d} z=\int \frac{1}{x} \mathrm{~d} x$
$\Rightarrow \ln (\sec z+\tan z)=\ln k x$
$O R \ln \tan \left(\frac{1}{2} z+\frac{1}{4} \pi\right)=\ln k x$
$\Rightarrow \sec \left(\frac{y}{x}\right)+\tan \left(\frac{y}{x}\right)=k x$
OR $\tan \left(\frac{y}{2 x}+\frac{1}{4} \pi\right)=k x$
(ii) $\quad(4, \pi) \Rightarrow \sec \frac{1}{4} \pi+\tan \frac{1}{4} \pi=4 k$

$$
O R \tan \left(\frac{1}{8} \pi+\frac{1}{4} \pi\right)=4 k
$$

$$
\Rightarrow \sec \left(\frac{y}{x}\right)+\tan \left(\frac{y}{x}\right)=\frac{1}{4}(1+\sqrt{2}) x
$$

$$
\text { OR } \tan \left(\frac{y}{2 x}+\frac{1}{4} \pi\right)=\left(\frac{1}{4} \tan \frac{3}{8} \pi\right) x \text { or } \frac{1}{4}(1+\sqrt{2}) x
$$

B1 For correct differentiation of substitution
M1 For substituting into DE
A1 For DE in variables separable form
M1 For attempt at integration to $\ln$ form on LHS

A1 For correct integration ( $k$ not required here)

A1 6 For correct solution
AEF including RHS $=\mathrm{e}^{(\ln x)+c}$

M1 $\quad$ For substituting $(4, \pi)$
into their solution (with $k$ )
A1 2 For correct solution AEF
Allow decimal equivalent $0.60355 x$
Allow $\mathrm{e}^{\ln x}$ for $x$

5 (i) $C+\mathrm{i} S=1+\frac{1}{2} \mathrm{e}^{\mathrm{i} \theta}+\frac{1}{4} \mathrm{e}^{2 \mathrm{i} \theta}+\frac{1}{8} \mathrm{e}^{3 \mathrm{i} \theta}+\ldots$

$$
=\frac{1}{1-\frac{1}{2} \mathrm{e}^{\mathrm{i} \theta}}=\frac{2}{2-\mathrm{e}^{\mathrm{i} \theta}}
$$

(ii)

$$
\begin{aligned}
& C+\mathrm{i} S=\frac{2\left(2-\mathrm{e}^{-\mathrm{i} \theta}\right)}{\left(2-\mathrm{e}^{\mathrm{i} \theta}\right)\left(2-\mathrm{e}^{-\mathrm{i} \theta}\right)} \\
& =\frac{4-2 \mathrm{e}^{-\mathrm{i} \theta}}{4-2\left(\mathrm{e}^{\mathrm{i} \theta}+\mathrm{e}^{-\mathrm{i} \theta}\right)+1}=\frac{4-2 \cos \theta+2 \mathrm{i} \sin \theta}{4-4 \cos \theta+1} \\
& \Rightarrow C=\frac{4-2 \cos \theta}{5-4 \cos \theta}, \quad S=\frac{2 \sin \theta}{5-4 \cos \theta}
\end{aligned}
$$

M1 For using $\cos n \theta+i \sin n \theta=\mathrm{e}^{\mathrm{i} n \theta}$
at least once for $n \geqslant 2$
A1 For correct series
M1 For using sum of infinite GP
A1 $\mathbf{4}$ For correct expression AG
SR For omission of 1st stage award up to M0 A0 M1 A1 OEW

M1 For multiplying top and bottom by complex conjugate

For reverting to $\cos \theta$ and $\sin \theta$ and equating $\operatorname{Re} O R \operatorname{Im}$ parts

A1 For correct expression for $C$ AG
A1 4
For correct expression for $S$

6 (i) Aux. equation $m^{2}+2 m+17(=0)$
$\Rightarrow m=-1 \pm 4 \mathrm{i}$
CF $(y=) \mathrm{e}^{-x}(A \cos 4 x+B \sin 4 x)$

PI $(y=) p x+q \Rightarrow 2 p+17(p x+q)=17 x+36$
$\Rightarrow p=1$
and $q=2$
GS $y=\mathrm{e}^{-x}(A \cos 4 x+B \sin 4 x)+x+2$
(ii) $\quad x \gg 0 \Rightarrow \mathrm{e}^{-x} \rightarrow 0$ OR very small
$\Rightarrow y=x+2$ approximately

For attempting to solve correct auxiliary equation A1 For correct roots
$\mathrm{A} 1 \sqrt{ } \quad$ For correct CF (allow $A_{\sin }^{\cos }(4 x+\varepsilon)$ )
(trig terms required, not $\mathrm{e}^{ \pm 4 \mathrm{i} x}$ )
f.t. from their $m$ with 2 arbitrary constants

M1 For stating and substituting PI of correct form
For correct value of $p$
For correct value of $q$
For GS. f.t. from their CF + PI with
2 arbitrary constants in CF and none in PI.
Requires $y=$.
B1 For correct statement. Allow graph
B1 $\sqrt{2}$ For correct equation
Allow $\approx, \rightarrow$ and in words
Allow relevant f.t. from linear part of GS

7 (i) $(1,3,5)$ and $(5,2,5) \Rightarrow \pm[4,-1,0]$ in $\Pi$
$\mathbf{n}=[2,-2,3] \times[4,-1,0]=k[1,4,2]$
$\Rightarrow \mathbf{r} .[1,4,2]=23$
(ii) METHOD 1

Perpendicular to $\Pi$ through $(-7,-3,0)$ meets $\Pi$
where $(-7+k)+4(-3+4 k)+2(2 k)=23$
$\Rightarrow k=2 \Rightarrow d=2 \sqrt{1^{2}+4^{2}+2^{2}}=2 \sqrt{21} \approx 9.165$
METHOD 2

M1 $\quad$ For finding a vector in $\Pi$
M1 For finding vector product of direction vectors of $l$ and a line in $\Pi$
A1 For correct $\mathbf{n}$
A1 4 For correct equation. Allow multiples
M1 For using perpendicular from point on $l$ to $\Pi$
Award mark for $k \mathbf{n}$ used
M1 For substituting parametric line coords into $\Pi$
M1 For normalising the $\mathbf{n}$ used in this part
A1 $\mathbf{4}$ For correct distance AEF
$\Pi$ is $x+4 y+2 z=23$
$\Rightarrow d=\frac{|(-7)+4(-3)+2(0)-23|}{\sqrt{1^{2}+4^{2}+2^{2}}}=2 \sqrt{21} \approx 9.165$

## METHOD 3

$\mathbf{m}=[1,3,5]-[-7,-3,0]=( \pm)[8,6,5]$
$O R=[5,2,5]-[-7,-3,0]=( \pm)[12,5,5]$
$\Rightarrow d=\frac{\mathbf{m} \cdot[1,4,2]}{\sqrt{1^{2}+4^{2}+2^{2}}}=\frac{42}{\sqrt{21}}=2 \sqrt{21} \approx 9.165$

## METHOD 4

$[-7,-3,0]+k[1,4,2]=[1,3,5]+s[2,-2,3]+t[4,-1,0]$ M1

M1 For setting up and solving 3 equations

M1 For normalising the $\mathbf{n}$ used in this part A1 For correct distance AEF

## METHOD 5

$d_{1}=\frac{23}{\sqrt{1^{2}+4^{2}+2^{2}}}=\frac{23}{\sqrt{21}}$
M1 For attempt to find distance from $O$ to $\Pi$
M1 $\quad \begin{aligned} & \text { For attempt to find distance from } O \text { to } \Pi \\ & O R \text { from } O \text { to parallel plane containing } l\end{aligned}$
$d_{2}=\frac{[-7,-3,0] \cdot[1,4,2]}{\sqrt{1^{2}+4^{2}+2^{2}}}=\frac{-19}{\sqrt{21}}$
M1 For normalising the $\mathbf{n}$ used in this part
M1 For finding $d_{1}-d_{2}$
$\Rightarrow d_{1}-d_{2}=d=\frac{23-(-19)}{\sqrt{21}}=2 \sqrt{21} \approx 9.165$
(iii) $(-7,-3,0)+k(1,4,2)$

Use $k=4$
$\mathbf{b}=[2,-2,3]$
$\mathbf{a}=[-3,13,8]$
$\mathbf{r}=[-3,13,8]+t[2,-2,3]$
M1 For substituting a point on $l$ into plane equation
For normalising the $\mathbf{n}$ used in this part For correct distance AEF
A1

M1 For finding a vector from $l$ to $\Pi$

M1 For finding m.n
M1 For normalising the $\mathbf{n}$ used in this part
A1 For correct distance AEF
As Method 1, using parametric form of $\Pi$
For using perpendicular from point on $l$ to $\Pi$
Award mark for $k \mathbf{n}$ used
$\left.\begin{array}{ll}k-2 s-4 t & =8 \\ 4 k+2 s+t & =6 \\ 2 k-3 s & =5\end{array}\right\} \Rightarrow k=2 \quad\left(s=-\frac{1}{3}, t=-\frac{4}{3}\right)$
$\Rightarrow d=2 \sqrt{1^{2}+4^{2}+2^{2}}=2 \sqrt{21} \approx 9.165$

A1 For correct distance AEF
M1 State or imply coordinates of a point on the reflected line
State or imply $2 \times$ distance from (ii)
Allow $k= \pm 4$ OR $\pm 4 \sqrt{21}$ f.t. from (ii)
B1 For stating correct direction
A1 4 For correct point seen in equation $\mathbf{r}=\mathbf{a}+t \mathbf{b}$ AEF in this form

## Mathematics

## Mark Scheme for June 2010

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of pupils of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, OCR Nationals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by Examiners. It does not indicate the details of the discussions which took place at an Examiners' meeting before marking commenced.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the Report on the Examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

## Mark Scheme for June 2010

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of pupils of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, OCR Nationals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by Examiners. It does not indicate the details of the discussions which took place at an Examiners' meeting before marking commenced.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the Report on the Examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

T\&I: (M1M1) B2 or B0 |

## Specimen Verbal Answers

$1 \quad \alpha \quad$ "Cases of infection must occur randomly, independently, singly and at constant average rate"
B0
$\beta \quad$ Above + "but it is contagious" B1
$\gamma \quad$ Above + "but not independent as it is contagious" B2
$\delta \quad$ "Not independent as it is contagious" B2
$\varepsilon \quad$ "Not constant average rate", or "not independent" B0
$\lambda$ "Not constant average rate because contagious" [needs more] B1
$\zeta$ "Not constant average rate because more likely at certain times of year" B2
$\mu \quad$ Probabilities changes because of different susceptibilities B0
$v \quad$ Not constant average rate because of different susceptibilities B2
$\eta \quad$ Correct but with unjustified or wrong extra assertion [scattergun] B1
$\theta$ More than one correct assertion, all justified B2
$\pi \quad$ Valid reason (e.g. "contagious") but not referred to conditions B1
[Focus is on explaining why the required assumptions might not apply. No credit for regurgitating learnt phrases, such as "events must occur randomly, independently, singly and at constant average rate, even if contextualised.]

2 Don't need either "yes" or "no".
$\alpha \quad$ "No it doesn't invalidate the calculation" [no reason] B0
$\beta$ "Binomial requires not chosen twice" [false] B0
$\gamma$ "Probability has to be constant but here the probabilities change" B0
$\delta \quad$ Same but "probability of being chosen" [false, but allow B1] B1
$\varepsilon \quad$ "Needs to be independently chosen but probabilities change" [confusion] BO
$\zeta \quad$ "Needs to be independent but one choice affects another" [correct] B2
$\eta$ "The sample is large so it makes little difference" [false] B0
$\theta \quad$ "The population is large so it makes little difference" [true] B2
$\lambda \quad$ Both correct and wrong reasons (scattergun approach) B1
[Focus is on modelling conditions for binomial: On every choice of a member of the sample, each member of the population is equally likely to be chosen; and each choice is independent of all other choices.
Recall that in fact even without replacement the probability that any one person is chosen is the same for each choice. Also, the binomial "independence" condition does require the possibility of the same person being chosen twice.]

## Mark Scheme for June 2010

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of pupils of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, OCR Nationals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by Examiners. It does not indicate the details of the discussions which took place at an Examiners' meeting before marking commenced.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the Report on the Examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

| 1(i) <br> (a) | 31758742437056619528 (may be shown vertically or as separate swaps) <br> 9 comparisons and 8 swaps <br> The smallest (final) mark, 28 | M1 <br> A1 <br> B1 <br> B1 | [4] | 28 moved to the end of the list, no other values moved Correct list at end of first pass (cao) <br> 9 and 8 (written, not tallies) (cao) - if not specified, assume the larger value is comparisons (their) 28 or smallest/least or final/last/end <br> If sorted into increasing order: 2831754243705661 8795 <br> M0 A0, then 9 and $6=\mathrm{B} 1$ and (their) 95 or largest/greatest/biggest or final//last/end = B1 |
| :---: | :---: | :---: | :---: | :---: |
| (b) | 75874243705661953128 | B1 | [1] | Correct list at end of second pass <br> If sorted into increasing order and already penalised in (i)(a) then condone here: 28314243705661758795 |
| (c) | 7 more passes | B1 | [1] | $7 \text { (cao) }$ |
| (ii) | $\begin{array}{llllllllll} \hline 31 & 28 & 75 & 87 & 42 & 43 & 70 & 56 & 61 & 95 \\ 75 & 31 & 28 & 87 & 42 & 43 & 70 & 56 & 61 & 95 \end{array}$ <br> 1 comparison and 0 swaps in first pass 2 comparisons and 2 swaps in second pass | M1 <br> A1 <br> B1 <br> B1 | [4] | 312875 or 312875 ... <br> Correct list, in full, at end of second pass Lists must be easily found, not picked out from working, if the candidate has labelled passes use them as labelled 1 and 0 (written)(cao) may appear next to list 2 and 2 (written)(cao) may appear next to list <br> If sorted into increasing order: 283175 ... $\mathrm{M} 0, \mathrm{~A} 0$, then 1 and $1=\mathrm{B} 1 ; 1$ and $0=\mathrm{B} 1$ |
| (iii) | Bubble sort does not terminate early, since it takes 9 passes to get 95 to the front of the list, so it uses $9+8+\ldots+1$ or 45 comparisons <br> Shuttle sort takes fewer than $1+2+\ldots+9$ comparisons, since, for example, in the fourth pass 42 will be compared with 28,31 and 75 but not with 87. | B1 <br> B1 | [2] | Identifying that bubble sort does not terminate early <br> (Just stating $9+8+\ldots+1$ or $45=\mathrm{B} 0$ ) <br> Allow 'the largest number is at the end of the list' or '95 at end' <br> A good explanation of why shuttle sort requires fewer comparisons in this particular case <br> Do not accept 'because the list is not in reverse order' |
| (iv) | $\begin{aligned} & 20 \times\left(\frac{50}{10}\right)^{2} \\ & =500 \text { seconds } \end{aligned}$ | $\begin{aligned} & \hline \text { M1 } \\ & \text { A1 } \end{aligned}$ | [2] | Correct method <br> 500 seconds or 8 mins 20 sec (without wrong working) |

| 2(i) | Cannot have an odd number of odd nodes Odd vertices come in pairs | B1 | [1] | Sum of orders must be even <br> Sum of orders is 9 so 4.5 arcs (which is impossible) |
| :---: | :---: | :---: | :---: | :---: |
| (ii) | eg <br> Many other correct possibilities | M1 A1 | [2] | A diagram showing a graph with four vertices that is not connected and not simple <br> Vertices have orders 1, 2, 3, 4 |
| (iii) | The vertex of order 4 needs to connect to four other vertices, but there are only three other vertices available, so one vertex must be joined twice or the vertex of order 4 is connected to itself. Hence the graph cannot be simple | M1 A1 | [2] | Specifically identifying that the problem is with the vertex of order 4 <br> Explaining why the graph cannot be simple (either reason) and stating that simple cannot be achieved <br> Ignore any claims about whether or not the graph is connected |
| (iv) <br> (a) | Each vertex of order 4 connects to each of the others, since graph is simple. Hence the other two vertices must have order (at least) 3. But Eulerian, so all must have order 4. | B1 | [1] | Any reasonable explanation, but not just a diagram of a specific case <br> 'the other two must be odd but they can't because <br> Eulerian' is not enough <br> Note: the graph has five vertices |
| (b) | Graph is Eulerian - so each vertex order is even; simple - so no vertex has order more than 4; and connected - so no vertex has order 0 . Hence each vertex has order either 2 or 4 . But cannot have 3 or 4 vertices of order 4 . So must have $0,1,2$ or 5 vertices of order 4. | B1 <br> M1 <br> A1 | [3] | Explaining why there are only four such graphs Or list all the possibilities (eg 222224222244222 44444) <br> Any two correct (note: must be simply connected and Eulerian) <br> All four correct and no extras (apart from topologically equivalent variations) |

| 3(i) | $\begin{aligned} & y \geq x \\ & x \geq 0 \\ & y \leq 7-\frac{2}{3} x \end{aligned}$ | $\begin{aligned} & \text { M1 } \\ & \text { M1 } \\ & \text { A1 } \end{aligned}$ | [3] | Boundaries $y=x$ and $x=0$ in any form (may be shown as an equality or an inequality with inequality sign wrong) Boundary $2 x+3 y=21$ in any form All inequalities correct (and any extras do not affect the feasible region) |
| :---: | :---: | :---: | :---: | :---: |
| (ii) | $\begin{aligned} & (0,7) \Rightarrow 42 \\ & (4.2,4.2) \Rightarrow 29.4 \text { or }\left(\frac{21}{5}, \frac{21}{5}\right) \Rightarrow \frac{147}{5} \end{aligned}$ <br> At optimum, $x=0$ and $y=7$ $P_{1}=42$ | M1 <br> A1 <br> A1 | [3] | Substantially correct attempt at testing vertices (at least one vertex apart from $(0,0)$ ) or using a line of constant profit (may be implied) <br> Accept ( 0,7 ) identified (cao) <br> 42 (stated) (cao) NOT deduced from earlier working, unless identified |
| (iii) | $\begin{aligned} & (4.2,4.2) \\ & P_{k}=4.2(k+6) \text { or } 4.2 k+25.2 \end{aligned}$ | $\begin{aligned} & \hline \text { B1 } \\ & \text { B1 } \end{aligned}$ | [2] | cao <br> cao |
| (iv) | $\begin{aligned} & \text { Compare } k x+6 y \text { with boundary } 2 x+3 y \\ & \text { or algebraically, } 4.2(k+6) \text { with } 42 \\ & \text { or }-\frac{k}{6} \text { with }-\frac{2}{3} \\ & \Rightarrow k \leq 4 \\ & k \leq 4 \text { or } k<4 \text { implies M1, A1 } \end{aligned}$ | M1 A1 | [2] | Algebraically or using line, or implied (allow = here) <br> Accept $k<4$ <br> No need to say that $k>0$, but candidates may also say $k>$ 0 $\text { or } k \geq 0$ <br> Note: $k$ is continuous, so answers such as ' $k=1,2,3,4$ ' or ' $k=1,2,3$ ', with no other working, would get M1, A0 |

| 4(i) | Route: $A-B-D-F-G$ | M1 <br> A1 <br> B1 <br> B1 <br> B1 | [5] | 1.7 shown as a temporary label at $G$ <br> All temporary labels correct with no extras (may not have written temporary label when it becomes permanent) <br> All permanent labels correct (cao) <br> Order of labelling correct (cao) <br> This route written down (not reversed) (cao) |
| :---: | :---: | :---: | :---: | :---: |
| (ii) | Route Inspection problem | B1 | [1] | Accept Chinese postman Allow 'postman', 'postman route', but not just 'inspection' |
| (iii) | $\begin{aligned} & C D(C B D)=0.3, D G(D F G)=0.65, \\ & C G(C B D F G)=0.95 \\ & C D(C B D) \text { and } F G=0.75 \\ & \text { or } C D(C B D) \text { and } E G(E F G)=1.05 \\ & \text { Length }=3.7+0.5+0.3+0.75 \\ & =5.25 \mathrm{~km} \end{aligned}$ | $\begin{aligned} & \text { M1 } \\ & \text { A1 } \\ & \text { M1 } \\ & \\ & \text { M1 } \\ & \text { A1 } \end{aligned}$ |  | Any one of these seen (explicitly or as part of a calculation) <br> All three of these seen (explicitly or as parts of calculations) <br> Or either of these with $A B$ to give 1.25 or 1.55 respectively <br> Adding their 0.75 to 3.7 or their 0.75 to $3.7+0.5+0.3$ (cao) units not needed <br> 5.25 implies M1, M1 A1, irrespective of working |
| (iv) | $\begin{aligned} & B-D-F-G-C-B \\ & 1.9 \mathrm{~km} \end{aligned}$ | $\begin{aligned} & \hline \text { B1 } \\ & \text { B1 } \end{aligned}$ |  | cao <br> 1.9 (cao) irrespective of method |
| (v) | [TREE] <br> Vertices added in order $B D C F$ or $B D F C$ <br> Arcs added in order $B D, B C, D F$ or $B D, D F, B C$ <br> Two shortest arcs from $G$ total $0.45+0.65=1.1$ <br> Lower bound $=0.5+1.1=1.6 \mathrm{~km}$ | $\begin{array}{\|l} \hline \text { B1 } \\ \text { B1 } \\ \text { M1 } \\ \text { A1 } \end{array}$ |  | Correct tree drawn <br> A valid order of adding vertices or a valid order of adding arcs <br> 0.45 and 0.65 , or total 1.1 (may be implied from 1.6) <br> 1.6 (cao) units not needed <br> 1.6 implies M1, A1 |

|  | Make 5 litres of fruit salad only | B1 | [13] | Interpretation of their final (non-negative) $\underline{x}, y$ and $z$, in context (need 'only' or equivalent; '5 fruit salads' is not enough) $x=5, y=0, z=0 \text { gives B0 }$ |
| :---: | :---: | :---: | :---: | :---: |
| (iii) | $60 \div 12=5,50 \div 6=8 \frac{1}{3}, 20 \div 3=6 \frac{2}{3}$ <br> Pivot on the 12 in the $x$ column <br> New row $2=$ row $2 \div 12$ <br> New row 1 = row $1+100 \times$ new row 2 <br> Showing that there are no negative entries in objective row <br> Saying that optimum has been achieved ('no negatives in top row') | B1 M1 A1 M1 A1 | [5] | Correct pivot choice from their $x$ column <br> Correct method for their pivot row (seen or implied from correct row in tableau) <br> Correct method for their objective row seen as a formula <br> Showing that there are no negative entries in objective row <br> Or achieving a final tableau, in one iteration, with exactly four basis columns and non-negative entries in final column, in which the value of the objective has not decreased |

| 1 | (i) |  | B1 | A correct bipartite graph | 1] |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | (ii) |  | B1 | A second bipartite graph showing the incomplete matching correctly <br> No augmentations made, even if in pencil. Ignore the addition of an $X$ vertex though. | [1] |
|  | (iii) | $\begin{aligned} & \hline H-P-G-Q \\ & \text { Axe handle }=\text { Prof Mulberry } \\ & \text { Broomstick }=\text { Miss Olive } \\ & \text { Drainpipe }=\text { Mrs Lemon } \\ & \text { Fence post }=\text { Mr Nutmeg } \\ & \text { Golf club }=\text { Rev Quince } \\ & \text { Hammer }=\text { Capt Peach } \end{aligned}$ | B1 B1 | This path in any reasonable form or in reverse. Accept $X-H-P-G-Q$ Not any longer path from $H$ to $Q$ <br> This complete matching written down (use initials of surnames if ambiguous, eg Rev Pineapple is interpreted as $P=$ Capt Peach) | [2] |
|  | (iv) | $\begin{aligned} & \hline \text { Axe handle = Rev Quince } \\ & \text { Broomstick = Prof Mulberry } \\ & \text { Drainpipe = Mr Nutmeg } \\ & \text { Fence post }=\text { Miss Olive } \\ & \text { Golf club }=\text { Capt Peach } \\ & \text { Hammer }=\text { Mrs Lemon } \end{aligned}$ | M1 <br> A1 | A different complete matching in any form <br> A valid complete matching in which none of the suspects uses the same weapon as in their solution to (iii) | [2] |
| Total $=$ |  |  |  |  | 6 |

| 5 | (i) | $\begin{aligned} & 21+36+7+18 \\ & =82 \end{aligned}$ | M1 <br> A1 | Evidence of using the correct cut (eg 21 ( $\pm 23)+36+7+18$ seen) 82 | [2] |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | (ii) | At most 17 can leave $C$ so there cannot be as much as 20 or 18 entering it <br> At most 17 can enter $E$ so there cannot be $7+18$ $=25$ leaving it <br> Maximum that can flow in arc $H T$ is 33 <br> Flow along arc $H G=0$ | B1 <br> B1 <br> B1 <br> B1 | $17<$ both 20 and 18 (NOT $17<38$ ) $17<7+18$ | [2] <br> [2] |
|  | (iii) | A diagram showing a flow of 58 in which amount in equals amount out at each vertex, apart from $S$ and $T$ <br> Arcs $C E, F H$ and $G T$ are saturated and other arc capacities are not exceeded <br> $\operatorname{Cut} X=\{S, A, B, C, D, F, G\}, Y=\{E, H, T\}$ <br> Or cut through $G T, G H, F H, E F$ and $C E$ | M1 <br> A1 <br> B1 | Assume that "blanks" mean 0 or full to capacity, provided consistent <br> This cut presented in any form (accept it drawn on diagram) | [3] |
|  | (iv) | Substantially correct attempt in which excess capacities and potential backflows marked correctly on arcs $C E, F H$ and $G T$ <br> Their excess capacities and potential backflows marked correctly on arcs out of $S$ and arcs into $T$ and on $H G$ | M1 <br> A1 | Assume that blanks mean 0 Accept all directions swapped <br> Check directions on $\underline{H G}$ carefully <br> If no flow in (iii), or ambiguous, then any valid flow > 0 labelled correctly gets M1, but must also be a flow of 58 to get A1 | [2] |
|  | (v) | Feasible route(s) written that send an additional 2 through system (or more on follow through) <br> All route(s) valid with an additional 2 along $G H$ | M1 <br> A1 | Routes must be written out properly eg route $S B F G H T$ by 2 | [2] |
|  | (vi) | Their flow from part (iii) augmented by their routes in part (v) <br> No more can flow across the cut $X=\{S, C\}, Y=\{A, B, D, E, F, G, H, T\}$ | M1 <br> A1 | Follow through if possible <br> Any reasonable explanation | [2] |
|  |  |  |  | Total = | 15 |

PARTS (i), (ii) AND (iii) ANSWERED ON INSERT
